

## Fantasy Stock Competition

### Scoring

- The competition is scored on the percent increase/decrease of each stock (NOT dollar increase).
- Example:
  - If a stock increases by 2.5%, the team earns 2.5 points.
  - If a stock decreases by 4.05%, the team loses 4.05 points.
- Each week runs from opening bell on Monday morning to closing bell on Friday afternoon.
- Every Monday the winners will be announced.

### Draft

- The draft order will be chosen at random.
- The draft order reverses after each round so that the last manager to pick is the first to pick in the next round (1-12, 12-1, 1-12, etc.).

### Waiver Priority

- Each Monday a team can drop one stock and add another.
- The waiver priority order starts in reverse draft order.
- When you do an add/drop, your team goes to the bottom of the order.
- For example, if you are the number three priority and do not add/drop and the teams who are 1 & 2 do an add/drop, next week you will have the number 1 priority.

### Schedule Suggestions

- Schedules can be customized to individual classrooms. You may choose to have a regular season, playoffs, and a championship.
- Students must be actively engaged in the competition every week. There should be no bye week.
- If there is an odd number of teams, use the Dow Jones Industrial Average as a team.

### Prize

- Prizes are bespoke to each class.
